# Canadian Journal of Anaesthesia

# Index of Subjects

VOLUME 41, 1994

## Acid-base equilibrium

- acidosis, and increase of extracellular potassium combined with halothane, effect on contractile force and resting tension in the heart (atria) of the guinea pig: laboratory investigation (Oshita *et al*), 534
- measurement: blood gas monitoring system for continuous intra-arterial (CIABG), assessment: clinical report (Uchida *et al*), 64

Acupressure for intrathecal narcotic-induced nausea and vomiting post-caesarean section (Duggal *et al*), A29-B

Adrenoleukodystrophy, see Complications

## Age factor

- age and the onset of desaturation in apnoeic children (Patel *et al*), 771
- age-related decrease in toe-thumb temperature difference with lumbar epidural anaesthesia (Sato *et al*), 579
- elderly, cost-utility evaluation of post-operative analgesia in a community hospital using decision analysis (Peter), A22-B
- young and elderly adults, mivacurium dose-response relationships and reversal with edrophonium in (Donati *et al*), A21-B

Aikenhead, David Campbell (1891-1973): History of Canadian Anaesthesia (Shephard), 547

## Airway

- *assessment*
  - changing Mallampati score during labour: clinical report (Farcon *et al*), 50
  - in a patient with a large mediastinal mass presenting for pharyngeal biopsy: clinical anaesthesia file (Elwood and Eagle), 861
  - problems and predictions (Rose and Cohen), 372
- difficult, in the obstetric patient, a combined ventilatory wedging device for management: correspondence (Sabo *et al*), 79
- emergency care, lighting the way for intubation: correspondence (Crosby), 78
- fiberoptic intubation: continuing medical education (Morris), 996
- *laryngeal mask*
  - cuff pressure and position during anaesthesia lasting one to two hours (Brimacombe and Berry), 589
  - causing postoperative sore throat in children (Splinter *et al*), 1081
  - for endotracheal patients: correspondence (Baraka), 78
  - in cardiac surgery: correspondence (Llagunes *et al*), 1016

## - management

- assessment of mask lung ventilation administered by ambulance personnel (Devitt *et al*), 111; correspondence (Martens), 872; reply (Devitt), 872

## - obstruction

- during anaesthesia for anterior cervical cord decompression: correspondence (Beaulieu and Davies), 874
- following placement of a subclavian Hickman catheter: clinical report (O'Hara *et al*), 241
- in an infant, anaesthetic management: editorial (Creighton), 174
- in a neonate with prenatally diagnosed cervical tumour and upper airway obstruction, anaesthetic management: clinical report (Tanaka *et al*), 236
- post-carotid endarterectomy (Sharma *et al*), A38-B

Alcohol, abuse in three medical specialties: anaesthesia, medicine and surgery (Lutsky *et al*), 561

Alfentanil, see Analgesics, Anaesthetics, Intravenous

## Allergy

- anaphylaxis and anaesthesia: editorial (Withington), 1133
- drug allergies in the surgical population: (Ricardo *et al*), 1149
- histamine causing bronchoconstriction, a comparison of sevoflurane with halothane, enflurane and isoflurane: laboratory investigation (Katoh and Ikeda), 1214

Amnesia, see Memory

Anaphylaxis see Allergy

## Anaesthesia

### - adverse events in

- drug error: clinical report (Orser and Oxorn), 120; correspondence (Yemen), 870; reply 1 (Orser *et al*), 870; reply 2 (Davies and Webb), 870
- the wrong drug: editorial (Davies and Webb), 83
- allergic reactions and anaphylaxis in: editorial (Withington), 1133
- *cardiac*
  - combined technique for: editorial (Ralley), 1140
  - monitoring during paediatric cardiac anaesthesia: review article (Purdy), 818
  - myocardial ischaemia following coronary artery bypass, effect of (PCA) on incidence of (Searle *et al*), 198
  - propofol sequestration within the extracorporeal circuit (Hynynen *et al*), 583
  - transplant patients, anaesthesia for: correspondence (Backman *et al*), 655; reply (Cheng), 656
  - warm cardiac irrigation during surgery, haemodynamic consequences of (Lingaraju *et al*), 384

- cardiovascular
  - comparison of pipecuronium with pancuronium on haemodynamic variables and plasma catecholamines in coronary artery bypass patients (Neidhart *et al*), 469
  - coronary artery bypass surgery supplemented with subarachnoid bupivacaine and morphine: clinical report (Kowalewski *et al*), 1189
  - thyrotoxicosis factitia in a post-aortocoronary bypass patient: clinical report (Redahan and Karski), 969
- care, structural aspects of: editorial (Davies and Priddy), 661
- costs, see under Anaesthesia: quality assurance, statistics

- spinal
  - for Caesarean section in a patient with brain neoplasma: correspondence (Atanasoff *et al*), 163
  - mid-lumbar block for transurethral prostatectomy (Beers *et al*), 807
  - not general enhances neutrophil biocidal activity in hip arthroplasty patients: laboratory investigation (Erskine *et al*), 632
  - respiratory depression associated with meperidine spinal anaesthesia: clinical report (Ong and Segstro), 725
  - role of vasopressors in management of hypotension induced by epidural and spinal: review article (Morgan), 404
  - vecuronium neuromuscular blockade, localized hypothermia influences assessment of recovery from (Young *et al*), 1172
  - with bupivacaine and morphine supplementing general anaesthesia for CABG surgery: clinical report (Kowalewski *et al*), 1189
- subarachnoid, a randomized, blinded comparison of 20 mg versus 25 mg isobaric bupivacaine for (Crosby *et al*), A26-B
- subcutaneous infiltration for analgesia following foot surgery, compared with lateral popliteal sciatic nerve block (McLeod *et al*), 673
- test dose, intrathecal, in epidural analgesia, diagnostic accuracy of (Colonna-Romano *et al*), 572

#### Anaesthetics

- concentrations in operating room air: the need for periodic quantitative measurement (LeDez *et al*), A52-A
- choice of, effects the hemodynamic response to fat embolism (Guest *et al*), A5-B

- cost: does not affect drug usage (Horrow and Rosenberg), 1047; see also Anaesthesia, quality assurance; statistics
- errors, prevention: clinical report (Orser and Oxorn), 120; correspondence (Agarwal *et al*), 755; correspondence (Yemen), 870; reply (1) (Orser *et al*), 870; reply (2) (Davies), 8701
- labelling: clinical report (Orser and Oxorn), 120; correspondence (Boldt), 75; (Dain), 755
- gases
  - nitrous oxide
    - compared with isoflurane for intraoperative monitoring of somatosensory-evoked potentials (Lam *et al*), 295
    - diffusion into tracheal cuffs, evaluation of pressure increases due to (Sosis and Blazek), A51-A
    - in patients with Wolff-Parkinson-White syndrome has no electrophysiological effects on the function of sinus node conduction, the normal arterioventricular system or the accessory pathways (Dobkowski *et al*), A45-B
  - isoflurane N<sub>2</sub>O and surgery, transcranial Doppler sonography during, (Schregel *et al*), 607
  - lasting one to two hours, laryngeal mask airway cuff pressure and position during (Brimacombe and Berry), 589
  - two methods of administration of inhaled NO (nitric oxide) comparison of, on NO<sub>2</sub> (nitrite) production (Dubé *et al*), A34-B

#### Anaesthetics, Intravenous

- alfentanil/propofol total intravenous anaesthesia, midazolam decreases the incidence of awareness with recall during (Blew *et al*), A3-A
- delivery devices and intravenous infusion anaesthesia: continuing medical education (Miller), 639
- droperidol
  - and ondansetron in out-patient laparoscopy (Koutsoukos and Belo), A70-B
  - compared with propofol and metoclopramide for the treatment of postoperative nausea and vomiting (Lacroix *et al*), A66-A
- fentanyl
  - can parturients reliably distinguish between epidural and intravenous (Morris *et al*), A6-B
  - compared with pentamorphone in balanced anaesthesia during general surgery (Kelly *et al*), 703
  - comparison of two doses of epidural, for Caesarean section: correspondence (Lamont), 452; reply (Halpern), 452
  - thoracic epidural, analgesic effects of: correspondence (Hudes *et al*), 1123
- ketamine
  - compared with midazolam for oral premedication in paediatric ambulatory patients (Alderdon and Lerman), 221

- hypomagnesemia and (Smith *et al*), A71-A
  - total intravenous anaesthesia with, ventilation during (Joly and Benhamou), 227
  - methohexital and pentobarbital reduce nociceptive threshold in the rat (Ewen *et al*), A19-B
  - metoprolol or nifedipine, interactions of propofol with, on hemodynamic, myocardial blood flow and metabolism in a swine model of chronic coronary occlusion (Cheng *et al*), A17-A
  - midazolam propofol co-induction does not delay recovery from anaesthesia (Elwood *et al*), A64-B
  - morphine and bupivacaine, subarachnoid, supplementing anaesthesia for coronary artery bypass surgery: clinical report (Kowalewski *et al*), 1189
  - pentamorphone compared with fentanyl in balanced anaesthesia during general surgery (Kelly *et al*), 703
  - *propofol*
    - alfentanil total intravenous anaesthesia: midazolam decreases the incidence of awareness with recall during (Blew *et al*), A3-A; midazolam does not prolong recovery following (Blew *et al*), A63-B
    - compared with thiopentone and halothane in paediatric ambulatory patients (Hannallah *et al*), 12
    - for continuous intravenous sedation after aortocoronary bypass graft surgery: dose finding study (Karski *et al*), A17-B
    - for pulsed dye laser treatments in paediatric patients: clinical report (Vischoff and Charest), 728
    - induced neuroexcitation and receptor desensitization: editorial (Orser), 366
    - induction of anaesthesia with, the 40 Hz auditory steady state response (40 Hz ASSR) during (Plourde and Malik), A51-B
    - inhibits phagocytosis and killing of *staphylococcus aureus* and *escherichia coli* by polymorphonuclear leukocytes *in vitro*: laboratory investigation (Krumholtz *et al*), 446
    - interactions of, with metoprolol or nifedipine on hemodynamic, myocardial blood flow and metabolism in a swine model of chronic coronary occlusion (Cheng *et al*) A17-A
    - intracoronary, does not decrease myocardial contractile function in the dog: laboratory investigation (Belo *et al*), 43
    - opisthotonos following: a nonepileptic perspective and treatment strategy: clinical report (Ries *et al*), 414
    - seizures and antidepressants: correspondence (Orser and Oxorn), 262
    - selectively inhibits the NMDA subtype of glutamate receptor (Bertlik *et al*), A6-A
    - sequestration within the extracorporeal circuit (Hynynen *et al*), 583
    - short term sedation with, after cardiac surgery, recovery time following (Karski *et al*), A40-A
    - succinylcholine for rapid sequence intubation, pre-induction volume loading maintains haemodynamic stability during (Rausa *et al*), A62-B
    - thiopentone, recovery characteristics following induction of anaesthesia with (Rashiq *et al*), 1166
    - treatment of postoperative emesis in children (Markakis *et al*), A58-B
    - versus isoflurane, myocardial ischemia during carotid endarterectomy (Mutch *et al*), A13-A
  - *sufentanil*
    - epidural, added to epidural local anaesthetic solutions for Caesarean section, effects of (Crosby *et al*), 192
    - with propofol versus sufentanil-midazolam anaesthesia for elective myocardial revascularization (Ralley *et al*), A47-A
  - *thiopentone*
    - atrial injection of, asystole induced by: correspondence (Jopling), 760
    - compared with halothane and propofol in paediatric ambulatory patients (Hannallah *et al*), 12
    - propofol combined, recovery characteristics following induction of anaesthesia with (Rashiq *et al*), 1166
- Anaesthetics, Local
- *bupivacaine*
    - for combined spinal epidural analgesia in advanced labour (Abouleish *et al*), 575
    - for intrapleural analgesia in a child with a mediastinal tumour: clinical report (Swinhoe and Pereira), 427
    - improves continuous postoperative epidural fentanyl analgesia after abdominal or thoracic surgery, 0.125% (Badner *et al*), 387
    - intraarticular, provides analgesia for knee joint replacement but not evidence of preemptive blockade (Badner *et al*), A74-B
    - kinetics of, during hyperthermia in rats: laboratory investigation (Bruguerolle *et al*), 253
    - metabolism in rats, increased by cigarette smoke: laboratory investigation (Bruguerolle *et al*), 733
    - morphine, subarachnoid, supplementing anaesthesia for coronary artery bypass surgery: clinical report (Kowalewski *et al*), 1189
    - thoracic epidural, analgesic effects of: correspondence (Hudes *et al*), 1123
    - 20 mg versus 25mg isobaric, for subarachnoid anaesthesia, a randomized blinded comparison of (Crosby *et al*), A26-B
  - 2-chloroprocaine for brachial plexus and sciatic nerve block combined (Khy and Girard), 919
  - *lidocaine*
    - age-related decrease in toe-thumb temperature difference with lumbar epidural anaesthesia (Sato *et al*), 579
    - condensed, cutaneous iontophoretic application of (Oshima *et al*), 677

- skin temperature as a guide to epidural anaesthesia dosing with (Sato *et al*), 232
  - use in the posterior approach to the lumbar plexus combined with sciatic nerve block (Farny *et al*), 486
  - meperidine spinal anaesthesia, respiratory depression associated with: clinical report (Ong and Segstro), 725
- Anaesthetics, Volatile**
- **enflurane**
    - and isoflurane in dogs, microcirculation during: laboratory investigation (Yano and Takaori), 149
    - convulsions after, in a schizophrenic patient receiving neuroleptics: clinical report (Vohra), 420
    - effect on bronchoconstriction caused by histamine, compared with halothane, isoflurane and sevoflurane: laboratory investigation (Katoh and Ikeda), 1214
  - **halothane**
    - absence of anti-trifluoroacetate antibody after, in patients with no or mild liver damage (Sakaguchi *et al*), 398
    - arrhythmogenic potential of dexamine hydrochloride during halothane anaesthesia in dogs: laboratory investigation (Neustein *et al*), 542
    - compared with isoflurane on diastolic and systolic ventricular function in the newborn pig (Graham *et al*), A54-B
    - contractile force and resting tension in the presence of, and increased extracellular potassium or decreased extracellular pH in isolated guinea pig atria: laboratory investigation (Oshita *et al*), 534
    - effects of hypoxia, progressive, obtained by decreasing  $FiO_2$  on arterial blood gases and acid-base balance in rats anaesthetized with: laboratory investigation (Gaudy *et al*), 347
    - effects on bronchoconstriction caused by histamine, compared with enflurane, isoflurane and sevoflurane: laboratory investigation (Katoh and Ikeda), 1214
    - impaired acquisition of the Morris Water Task for 24 hrs. after, in rats (McHugh and Pappius), A31-B
    - inhibits prostanoind-induced vasoconstriction of rat aorta preferentially: laboratory investigation (Yamamoto *et al*), 991
    - mechanism responsible for the inhibition of endothelium-dependent relaxation during halothane anaesthesia: laboratory investigation (Nakamura *et al*), 340
    - nitrous oxide for myasthenic patients, rapid inhalation induction with (Ruiz-Neto *et al*), 102
    - or thiopentone, compared with propofol in paediatric ambulatory patients (Hannallah *et al*), 12
  - **isoflurane**
    - and enflurane in dogs, microcirculation during: laboratory investigation (Yano and Takaori), 149
    - compared with halothane on diastolic and systolic ventricular function in the newborn pig (Graham *et al*), A54-B
    - compared with nitrous oxide for intra-operative monitoring of somatosensory-evoked potentials (Lam *et al*), 295
    - does not impair acquisition of the Morris Water Task in rats (McHugh and Pappius) A31-B
    - effects on bronchoconstriction caused by histamine, compared with enflurane, halothane and sevoflurane: laboratory investigation (Katoh and Ikeda), 1214
    - inhibits prostanoind-induced vasoconstriction of rat aorta preferentially: laboratory investigation (Yamamoto *et al*), 991
    - MAC amnesia for (LeDez *et al*), A20-A

    - narcotic, opioid perioperative therapy, relates to postoperative nightmares (Knill *et al*), A24-B
    - NSAIDs, ketorolac vs morphine, comparison of effects of, on recovery from general anaesthesia during outpatient knee arthroplasty (Newton and Moote), A75-B

- opioids, causing postoperative respiratory depression following excision of carotid body tumours: clinical report (Baraka), 306
- sufentanil for combined spinal epidural analgesia in advanced labour (Abouleish *et al*), 575

#### Anatomy

- of the larynx: review article (Baxter), 332
- of the lumbar plexus as related to anaesthetic block (Farny *et al*), 480; correspondence (Lang), 1238; reply (Drolet and Girard), 1239

#### Animals

##### - dog(s)

- arrhythmogenic potential of dopexamine hydrochloride during halothane anaesthesia in: laboratory investigation (Neustein *et al*), 542
- effects of intracoronary midazolam on systolic function in the dog heart (Belo and Mazer), A70-A
- microcirculation during enflurane and isoflurane anaesthesia in: laboratory investigation (Yano and Takaori), 149

- goat(s), dose-response and duration of action of succinylcholine and vecuronium in seven muscles in (Ibebunjo and Donati), A69-A

- guinea pig heart (atria), isolated, contractile force and resting tension in the presence of halothane and increased extracellular potassium or decreased extracellular pH in: laboratory investigations, (Oshita *et al*), 534

- mice, action of neostigmine and edrophonium on the neuromuscular junction of the mouse omohyoid muscle in the presence of D-tubocurarine (Fauvel *et al*), A20-B

##### - pig(s)

- newborn, comparison of isoflurane and halothane on diastolic and systolic ventricular function in (Graham *et al*), A54-B
- porcine model of acute raised intracranial pressure, lumbar epidural space compliance in (Grocott and Mutch), A7-A
- swine model of chronic coronary occlusion, interactions of propofol with metoprolol or nifedipine on hemodynamic myocardial blood flow and metabolism in (Cheng *et al*), A17-A

##### - rabbit(s)

- does metered dose inhaler aerosol salbutamol, delivered proximal to the endotracheal tube induce tracheal lesions in? (Shorten *et al*), A26-A
- intubated, effects of pulmonary aspiration of human breast milk and normal saline in (Shorten *et al*), A57-B

##### - rat(s)

- aorta, halothane and isoflurane preferentially inhibit prostanoid-induced vasoconstriction of: laboratory investigation (Yamamoto *et al*), 991
- bupivacaine
  - kinetics during hyperthermia in: laboratory investigation (Bruguerolle *et al*), 253

- metabolism, cigarette smoke increases: laboratory investigation (Bruguerolle *et al*), 733

- halothane, effect of, on modification of PaCO<sub>2</sub>, acid-base equilibrium and hypoxia in: laboratory investigation (Gaudy *et al*), 347

- intrathecal midazolam reduces isoflurane MAC and increases the apnoeic threshold in: laboratory investigation (Schwieger *et al*), 144

- pentobarbital and methohexital reduce nociceptive threshold in (Ewen *et al*), A19-B

- pithed, a dose-response study of the hemodynamic effects of doxacurium chloride in (Levytam *et al*), A40-B

- thiopental-induced hyperalgesia in, influence of serotonin and noradrenaline depletion on (Froelich *et al*), A18-A

- sheep model, cardiopulmonary effects of abdominal insufflation in pregnancy: fetal and maternal parameters in (Southerland *et al*), A59-B

#### Antagonists

##### - benzodiazepines

###### - flumazenil

- as a diagnostic tool in the differential diagnosis of coma in a critically ill patient: clinical report (Sprenger *et al*), 52

- for reversal of sedation with midazolam during regional anaesthesia (Claffey *et al*), 1084

##### - neuromuscular relaxants

###### - edrophonium

- and neostigmine, action of, on the neuromuscular junction of the mouse omohyoid muscle in the presence of D-tubocurarine (Fauvel *et al*), 20-B
- in young and elderly adults, mivacurium dose-response relationships and reversal with (Donati *et al*), A21-B

- eserine, mechanism of bradycardia produced by (Backman *et al*), A21-A

##### - neostigmine

- and edrophonium, action of, on the neuromuscular junction of the mouse omohyoid muscle in the presence of D-tubocurarine (Fauvel *et al*), A20-B

- and vecuronium, neuromuscular effects of, in Montreal and Paris (Salib *et al*), 908

- reversal of doxacurium and pancuronium neuromuscular blockade in children (Bevan *et al*), 1074

- pyridostigmine, mechanism of the bradycardia produced by (Backman *et al*), A21-A

##### - serotonin

- ondansetron (OND) and droperidol combined in outpatient laparoscopy (Koutsoukos and Belo), A70-B

- for prevention of postoperative nausea and vomiting: cost effectiveness analysis (CEA) (Mathieu), A23-B; meta-analysis of published studies provides precise estimates of the effectiveness (Lopez and Mathieu), A23-A

Anxiety, sedation, patient satisfaction and arterial oxygen saturation in premedicated patients undergoing cardiac catheterization (Bergeron *et al*), A32-B

#### Antibiotics

- cyclosporine-vecuronium, oral, interaction: correspondence (Ganjoo and Tewari), 1017

#### Anticholinergics

- hyoscine, unattended continuous infusion leading to delayed visual disturbances: correspondence (Kumar), 551

#### Aorta, see Arteries

Aortocoronary bypass, see under Surgery, cardiac

Aprotinin, see Blood coagulation

#### Arteries

- aorta of the rat, halothane and isoflurane preferentially inhibit prostanoind-induced vasoconstriction of: laboratory investigation (Yamamoto *et al*), 991
- carotid endarterectomy, myocardial ischaemia during, propofol versus isoflurane (Mutch *et al*), A13-A
- coronary artery occlusion, chronic, in a swine model, interactions of propofol with metoprolol or nifedipine on hemodynamic myocardial blood flow and metabolism (Cheng *et al*), A17-A
- vasodilation, mechanism of inhibition of endothelium-dependent relaxation by: laboratory investigation (Nakamura *et al*), 340

Aspiration, see Complications;

Gastrointestinal tract, stomach

Aspirin(e), see Pharmacology

Asthma, see Complications

#### Ataractics

- abuse, marijuana, in three medical specialties: anaesthesia, medicine and surgery (Lutsky *et al*), 561
- phenothiazines, thioxanthenes in a schizophrenic patient, convulsions after receiving enflurane: clinical report (Vohra), 420

Atelectasis, see Complications

Atracurium, see Neuromuscular relaxants

Awareness, see Anaesthesia, depth; Memory

Aztreonam, see Pharmacology

Bain system, see Equipment, anaesthesia circuits

Ballistocardiography, see Heart

Biopsy, pharyngeal, complicated by a mediastinal mass: clinical anaesthesia file (Elwood and Eagle), 861

Bleazard, John Albert (1888-1971): History of Canadian Anaesthesia (Shepherd), 156

#### Blood

##### - coagulation

###### - aprotinin

- high dose, reduces transfusion requirements of blood and blood products during orthotopic liver transplantation (Dobkowski *et al*), A33-B
- or tranexamic acid, high or low dose: blood loss in

patients undergoing repeat median sternotomy

(Murkin *et al*), A46-B; comparison of the efficacy of, to decrease blood loss and transfusion requirements in aspirin-treated cardiac surgical patients (Murkin *et al*), A33-A

- therapy to reduce blood loss in Jehovah's Witnesses: correspondence (Litvan *et al*), 77

##### - tranexamic acid

- comparison of effects of three different doses of, on postoperative bleeding in cardiac surgery performed without active systemic cooling (Karski *et al*), A41-A
- or aprotinin, high or low dose: blood loss in patients undergoing repeat median sternotomy randomized to (Murkin *et al*), A46-B; comparison of efficacy of, to decrease blood loss and transfusion requirements in aspirin-treated cardiac surgical patients (Murkin *et al*), A33-A

##### - flow

- cerebral flow, measurement by transcranial Doppler sonography during isoflurane/N<sub>2</sub>O anaesthesia and surgery (Schregel *et al*), 607
- microspheres, during enflurane and isoflurane anaesthesia in dogs: laboratory investigation (Yano and Takaori), 149

##### - velocity

- cerebral, during hyperventilation, influence of arterial oxygenation on (Matta *et al*), 1041
- fetal umbilical artery, epidural anaesthesia for elective Caesarean section does not influence (Marquette *et al*), 1053
- uterine and umbilical, during epidural anaesthesia for Caesarean section (Halpern *et al*), 1057

- glucose and cardiac output in post-surgical patients, initial distribution volume of (Ishihara *et al*), A32-A

##### - haemodynamics

###### - doxacurium hydrochloride

- and vecuronium in patients undergoing coronary artery bypass surgery (Smith *et al*), A35-B

- in patients undergoing elective cardiac surgery (McDonagh *et al*), A14-A

- dose-response study of, in the pithed rat (Levytam *et al*), A40-B

- myocardial blood flow and metabolism in a swine model of chronic coronary occlusion, interactions of propofol with metoprolol or nifedipine on (Cheng *et al*), A17-A

- perioperative and stress response, a prospective, randomized, controlled clinical trial of early versus conventional tracheal extubation following coronary artery bypass graft (CABG) surgery (Cheng *et al*), A16-B

- haemoglobin Hammersmith precludes monitoring with conventional pulse oximetry: clinical report (Lang *et al*), 965

- leukocytes, polymorphonuclear, propofol inhibits phagocytosis and killing of *staphylococcus aureus* and *escherichia coli* by: laboratory investigation (Krumholz *et al*), 446
  - loss
    - overestimated by anaesthetists: correspondence (Macario and Brock-Utne), 1017
    - predicting in surgery for idiopathic scoliosis (Guay *et al*), 775
  - methaemoglobinaemia, congenital, detected by preoperative pulse oximetry: clinical report (Chisholm and Stuart), 519

## Education

- anaesthesia, post-graduate, the experimental curriculum: an alternate model: medical education (Tweed and Donen), 1227
- anaesthetists' continuing medical practices, Maintenance of Competence (MOCOMP) pilot project (Clark *et al*), A22-A
- Canadian anaesthetists' overseas responsibility: the CAS International Education Fund: editorial (Sandison and Maltby), 1144
- quality assurance of resident training in anaesthetic drug management: clinical report (Orser and Oxorn), 120; correspondence (Yemen), 870; reply, 1 (Orser *et al*), 870; reply, 2 (Davies and Webb), 870
- residents' CAS competition: a 25 year review: occasional review (Mazer and McClenaghan), 116
- teaching effective cricoid pressure applications using a force measuring device (O'Leary *et al*), A5-A
- videotaped instruction of Vancouver sedative recovery scale for children, validation and reliability (Macnab *et al*), 913

## Embolism

- carbon dioxide: detection by capnography, transesophageal echocardiography, pulmonary artery pressure and precordial auscultation (Couture *et al*), A24-A
- cerebral microembolization during coronary artery bypass surgery (Naser *et al*), A4-A
- fat, hemodynamic response to, affected by choice of anaesthetic (Guest *et al*), A5-B
- pulmonary, detected by transoesophageal echocardiography during hip arthroplasty: clinical report (Lafont *et al*), 850
- venous, after thigh tourniquet deflation (Koller *et al*), A61-A

## Endothelin, see under Heart

## Enzymes

## - cholinesterase

- activity in infants: correspondence (Vassallo and Goudsouzian), 654; reply (Pasquariello and Schwartz), 654
- deficiency, plasma, in a premature neonate: correspondence (Roux and Ansermino), 263; reply (Pasquariello and Schwartz), 263

- peroxisomes, anaesthesia for the patient with neonatal adrenoleukodystrophy: clinical report (Schwartz *et al*), 56

## Epinephrine, see Sympathetic nervous system, pharmacology

## Epidural anaesthesia, see under Anaesthesia, obstetric;

## Anaesthetic techniques

- Epidural space, accidental injection of wrong fluid, aztreonam: correspondence (Ziser *et al*), 553

## Equipment

- airway mask lung ventilation by ambulance personnel and anaesthetists: a performance assessment (Devitt *et al*),

- 111; correspondence (Martens), 872; reply (Devitt), 872

- anaesthetic carts, precautions in labeling of drugs placed on, to avoid mistakes in identification: correspondence (Goresky and Pipa), 655

## - anaesthetic circuits

## - Bain

- low flow modification of, for remote anaesthesia and evacuation (Tweed *et al*), A49-B
- obstruction, don't let the Bain take the blame: correspondence (Uncles and Parke), 1015
- occluded by foreign body: clinical report (Wilkes and Lindsay), 137

- angiocatheters, force required to dislodge, influence of tape type and of mastisol and benzoïn on (Patel *et al*), A53-A

- blood pressure monitors, non-invasive, evaluation of accuracy of (Miller *et al*), A52-B

## - bronchoscopes, fiberoptic

- co-axial placement of endobronchial blocker: correspondence (Arndt *et al*), 1126
- continuing medical education (Morris), 996
- using a laryngeal mask airway: review article (Asai and Morris), 930

- cannula, percutaneous 14 French, perfect for establishing venous bypass access in orthoptic liver transplantation (OLT) (Frenette *et al*), A35-A

## - catheter(s)

- epidural, entrapment: correspondence (Fisher), 357
- Hickman acute airway obstruction following insertion of: clinical report (O'Hara *et al*), 241
- intravenous angiocatheters, influence of tape type and of skin preparation on force required to dislodge: equipment (Patel *et al*), 738
- pulmonary artery, bleeding from the SvP<sub>2</sub> monitoring port of, during cardiac surgery: correspondence (Inomata and Nishikawa), 877
- transtracheal, for paediatric endoscopic laser treatment of laryngeal and subglottic lesions: clinical report (Depierraz *et al*), 1200

- fluid warmers in adult patients, clinical evaluation of two (Patel *et al*), A53-B

- force measuring device for teaching cricoid pressure application (O'Leary *et al*), A5-A

- infusion pumps, intravenous infusion anaesthesia and delivery devices: continuing medical education (Miller), 638

## - laryngeal mask airway

- and children: correspondence (Ball), 1235; reply (Tham), 1235
- cuff pressure and position during anaesthesia lasting one to two hours (Brimacombe and Berry), 589
- features, effects and role: review article (Asai and Morris), 930

- for endentulous patients: correspondence (Baraka), 78
- in cardiac surgery: correspondence (Llagunes *et al*), 1016
- postoperative sore throat in children and the LMA (Splinter *et al*), 1081
- size of, for children: correspondence (Tham), 354
- spontaneous reinflation characteristics of: correspondence (Brimacombe), 873
- *laryngoscope(s)*
  - blades, light intensity and area of illumination provided by various: equipment (Tousignant and Tessler), 865
  - Bullard and the right arytenoid: correspondence (Katsnelson *et al*), 552
  - design: correspondence (Relle), 162; reply (Marks and Charters), 163; blade shape: correspondence (Norton), 263; reply (Charters and Marks), 264
  - fiberoptic, ultrathin, compared with a rigid laryngoscope for tracheal intubation in infants (Roth *et al*), 1069
  - mathematical model for osseous factors in difficult intubation, analysis of (Charters), 594
- lighted stylet to aid emergency intubation: correspondence (Crosby), 78
- *needles, spinal*
  - dural puncture headache and - a meta-analysis (Halpern and Preston), A28-A
  - 22 gauge, comparison of lateral deviation of (Sosis and Braverman), A75-A
- tourniquet use in children, physiologic change during (Goodarzi *et al*), A50-A
- *tubes*
  - gastric, vocal cord paralysis associated with insertion of: clinical report (Ibuki *et al*), 431
  - oesophageal tracheal combitube for difficult intubation: correspondence (Brimacombe and Berry), 655; reply (Baraka), 657
  - tracheal
    - cuffs, quantitative evaluation of pressure increases due to nitrous oxide diffusion into (Sosis and Blazek), A51-A
    - endotracheal ventilation catheter for jet ventilation during difficult intubation: clinical report (Cooper and Cohen), 1196
    - in infants, tracheal granulations secondary to wall compression in infants, caused by endotracheal tubes: correspondence (Yahagi *et al*), 1123
    - leak test: correspondence (Smith), 549; reply (Schwartz *et al*), 549
    - paediatric laser resistant, analysis of the dimensions and flow characteristics of (Sosis and Braverman), A56-A
    - single lumen, treatment of pulmonary artery haemorrhage with: correspondence (Mangar), 880
  - vaporizers, overfilling, key issues in: correspondence (Uncles and Conway), 878; reply (Hardy), 879
  - ventilating-wedging device for the parturient with airway difficulty: correspondence (Sabo *et al*), 79
  - ventilators, high frequency jet, for paediatric endoscopic laser treatment of laryngeal and subglottic lesions: clinical report (Depierraz *et al*), 1200

Eserine, see Antagonists, neuromuscular relaxants

Eye

  - pupil, mydriasis, unilateral, after induction of anaesthesia: clinical report (Prielipp), 140

see also Anaesthesia, ophthalmic

Extubation of trachea, see under Intubation, tracheal

Fat embolism, see Embolism

Fentanyl, see Anaesthetics, Intravenous; Analgesics

Fluid management of the paediatric patient (Steward), R87; R91

Flumazenil, see Antagonists, benzodiazepines

Gastrointestinal tract (stomach)

  - *gastric pH, gastric volume*
    - effect of sugarless gum chewing before surgery on (Dubin *et al*), 603
    - preanaesthetic oral ranitidine, omeprazole and metoclopramide for modifying: correspondence (Gombar *et al*), 879
    - preoperative, in children, omeprazole reduces
  - *nausea and vomiting*
    - post-caesarean section intrathecal narcotic induced, acupressure for (Duggal *et al*), A29-B
    - post-operative
      - in children, propofol as treatment (Markakis *et al*), A58-B
      - metoclopramine compared with granisetron for control of, following gynaecological surgery (Fujii *et al*), 291
      - ondansetron(O)
        - cost-effectiveness analysis (CEA) of prevention of, with (Mathieu), A23-B
        - meta-analysis of published studies provides precise estimates of effectiveness of, for prevention (Lopez and Mathieu), A23-A
        - propofol, droperidol and metoclopramide compared for the treatment (Lacroix *et al*), A66-A
    - stomach, gastric acidity and volume, preanaesthetic oral ranitidine, omeprazole and metoclopramide in reduction of: correspondence (Gombar *et al*), 879

General anaesthesia, see Anaesthesia, general; Anaesthetic techniques

Genetic factors

    - congenital laryngomalacia: clinical report (Baxter), 332

Glucose, see under Blood

Glutamate receptor, see under Receptors

Goat(s), see Animals

Headache, see Complications

Heart

#### - arrhythmias

- arrhythmogenic potential of dopexamine hydrochloride during halothane anaesthesia in dogs: laboratory investigation (Neustein *et al*), 542
- atria, contractility and resting tension in the presence of halothane: laboratory investigation (Oshita *et al*), 534
- bretylium compared with guanethidine in treatment of sympathetically mediated pain (Wharton *et al*), A73-B
- bradycardia
  - during cold ocular irrigation: the diving reflex: correspondence (Zimmerman *et al*), 875
  - mechanism of, produced by eserine and phryidostigmine (Backman *et al*), A21-A
- death from arrhythmias caused by oculocardiac reflex: correspondence (Lang and Van der Wal), 161; reply (Arndt), 161; (Smith), 760
- dysrhythmias, after arterial injection of thiopentone: correspondence (Jopling), 760

- ballistocardiography, sternal acceleration, and arterial pressure velocity analysis to determine stroke volume (McKay *et al*), A45-A

- baroreflex function and heart rate variability, effects of reversal of neuromuscular blockade on (van Vlymen and Parlow), A66-B

#### - cardiac

- catheterization, anxiety, sedation, patient satisfaction and arterial oxygen saturation in premedicated patients undergoing (Bergeron *et al*), A32-B
- ischaemia
  - effect of combined general and epidural anaesthesia with post-operative epidural analgesia on (Garnett *et al*), A46-A
  - postoperative myocardial and clonidine: correspondence (Fulgencio *et al*), 550
- morbidity, perioperative (Mangano), R13; R17
- output in post-surgical patients, initial distribution volume of glucose and (Ishihara *et al*), A32-A

- cardiorespiratory events, critical, leading to cardiopulmonary bypass (CPB) during sequential single lung transplant (SSLT) surgery (Hennessy *et al*), A42-A

- cardiopulmonary resuscitation, role of laryngeal mask airway in: review article (Asai and Morris), 930

- cardiovascular drugs, what's new in (Miller), R106; R114

- contractility, myocardial in the dog, intracoronary propofol does not decrease: laboratory investigation (Belo *et al*), 43

- echocardiography, transoesophageal (TEE), comparison of two methods of anaesthesia for (Goranson *et al*), A59-A

- endothelin, effect of general anaesthesia on the plasma levels of (Lee *et al*), A31-A

#### - myocardium

##### - infarction

- and ischaemia, postoperative, clinical trial of early versus conventional tracheal extubation following coronary artery bypass graft (CABG) surgery (Cheng *et al*), A48-B
- fatal in the postoperative period differs from fatal myocardial infarction elsewhere (Knill *et al*), A47-B
- recent in a diabetic patient, Caesarean section in: clinical report (Spencer *et al*), 516

##### - ischaemia

- and infarction, postoperative, clinical trial of early versus conventional tracheal extubation following coronary artery bypass graft (CABG) surgery (Cheng *et al*), A48-B
- during endarterectomy: propofol versus isoflurane (Mutch *et al*), A13-A
- in patients undergoing cardiac surgery with warm irrigation of the cardiac pouch (Lingaraju *et al*), 384

- nifedipine or propofol with metoprolol, interactions of, on hemodynamic, myocardial blood flow and metabolism in swine model of chronic coronary occlusion (Cheng *et al*), A17-A

- precordial auscultation, carbon dioxide embolism: detection by capnography, transesophageal echocardiography, pulmonary artery pressure and (Couture *et al*), A24-A

#### - rate

- and blood pressure variability in lumbar epidural anaesthesia, power spectral analysis of (Arakawa and Goto), 680
- variability, effect of reversal of neuromuscular blockade on baroreflex function and (van Vlymen and Parlow), A66-B
- revascularization, elective, comparison of sufentanil-propofol versus sufentanil-midazolam anaesthesia for (Ralley *et al*), A47-A
- stroke volume, sternal acceleration ballistocardiography and arterial pressure wave analysis to determine (McKay *et al*), A45-A

- transplant patients, anaesthesia for non-cardiac surgery in: correspondence (Backman *et al*), 655; reply (Cheng), 656
- vascular pressures, haemodynamic consequences of warm cardiac irrigation during cardiac surgery (Lingaraju *et al*), 384
- Hepatic, see Liver

- Hypothermia, see under Temperature
- Hypoxia
  - acute, effect of, on arterial blood gas and acid-base balance in rats anaesthetized with halothane: laboratory investigation (Gaudy *et al*), 347
  - caused by foreign body lodged in the Bain circuit: clinical report (Wilkes and Lindsay), 137
  - caused by intraoperative atelectasis: clinical report (Pivalizza and Tonnesen), 857
  - in children, associated with intravenous induction of anaesthesia (Gombar *et al*), 288

Immune response, bacterial, chemoluminescence in hip arthroplasty patients, effect of general and spinal anaesthesia on: laboratory investigation (Erskine *et al*), 632

Indomethacin, see under Hormones

Infants, see Anaesthesia, paediatric

#### Infection

- *escherichia coli*, effect of propofol on phagocytosis and killing of, by polymorphonuclear leukocytes *in vitro*: laboratory investigation (Krumholz *et al*), 446
- septicemia, improvement in level of consciousness following flumazenil administration in a critically ill patient with: clinical report (Sprenger *et al*), 52
- *staphylococcus aureus*
  - effect of propofol on phagocytosis and killing of, by polymorphonuclear leukocytes *in vitro* laboratory investigation (Krumholz *et al*), 446
  - LD50, altered by intralipid (Langevin *et al*), A37-B

Insufflation, see Anaesthetic techniques

Insulin, see Metabolism

#### Intensive care

- flumazenil to reverse or block the CNS effects of benzodiazepines in a febrile septic patient: clinical report (Sprenger *et al*), 52
- higher death rates in medical compared to surgical ICU patients with identical APACHE II scores (Wong *et al*), A38-A
- sedation with midazolam administered by continuous infusion, following major vascular surgery (Miller *et al*), 782

#### Interactions

- cocaine-abusing patients, drug interactions: editorial (Cheng), 883
- drug, effect of non-depolarizing relaxants and waiting time on muscle fasciculation response to succinylcholine (Pinchak *et al*), 206
- hyperparathyroidism, hypercalcaemia, pharmacodynamic behaviour of vecuronium in (Roland *et al*), 694
- mivacurium, rocuronium (ORG 9426) compared with succinylcholine for neuromuscular block, effect of different priming sequences on (Naguib), 902
- oral cyclosporine-vecuronium interaction: correspondence (Ganjoo and Tewari), 1017

Intravenous anaesthesia, see Anaesthetic techniques, Anaesthetics, Intravenous

#### Intubation

- "BURP" (backward, upward and right directed pressures) in difficult intubations: correspondence (Relle), 74
- difficult
  - analysis of mathematical model for osseous factors in (Charters), 594
  - oesophageal-tracheal combitube for: correspondence (Brimacombe and Berry), 656; reply (Baraka), 657
  - "tricks of the trade:" correspondence (Fisher), 658

- use of an endotracheal ventilation catheter for jet ventilation during: clinical report (Cooper and Cohen), 1196
- fiberoptic: continuing medical education (Morris), 996
- left main bronchus, unintentional intubation of, in a patient with tracheal stenosis: correspondence (Ezri *et al*), 76
- new light-guided technique for inexperienced intubators (Hung *et al*), A50-B
- rapid sequence, using propofol/succinylcholine, pre-induction volume loading maintains haemodynamic stability during (Rausa *et al*), A62-B
- tracheal
  - airway assessment: problems and predictions (Rose and Cohen), 372
  - and laryngoscopy, nicardipine and verapamil attenuate the pressor response to (Wig *et al*), 1185
  - awake technique, increases intracranial pressure without affecting cerebral blood flow velocity in infants (Millar and Bissonnette), 281
  - Bullard laryngoscope and the right arytenoid: correspondence (Katsnelson *et al*), 552
  - complications: unilateral mydriasis after induction of anaesthesia caused by ephrine/lidocaine spray to the airway: clinical report (Prielipp), 140
  - extubation
    - caudal morphine and, post cardiac surgery in children (Carr *et al*), A15-A
    - early versus conventional, following coronary artery bypass graft (CABG) surgery: perioperative hemodynamics and stress responses (Cheng *et al*), A16-B; postoperative complications and hospital discharge (Cheng *et al*), A49-A; postoperative myocardial ischemia and infarction (Cheng *et al*), A48-B; postoperative ventilatory dynamics (Cheng *et al*), A16-A
    - granulations secondary to wall compression by endotracheal tubes in infants: correspondence (Yahagi *et al*), 1123
  - laryngeal mask airway
    - review article (Asai and Morris), 931
    - postoperative sore throat in children and (Splinter *et al*), 1081
- laryngoscopy
  - and intubation, nicardipine and verapamil attenuate the pressor response to (Wig *et al*), 1185
  - difficult, B.U.R.P. is more effective than backward pressure on the thyroid cartilage in managing (LaLande and Knill), A65-B
  - difficult: obtaining the best view: editorial (Benumof), 361
  - technique, rapid, with atracurium: the timing principle (Koh and Chen), 688
- technique in infants, comparison of a rigid laryngoscope

with the ultrathin fiberoptic laryngoscope (Roth *et al*), 1069

# Ions

- light intensity and area of illumination provided by various laryngoscope blades: equipment (Tousignant and Tessler), 865
- magnesium, hypomagnesemia and ketamine anaesthesia (Smith *et al*), A71-A
- potassium, effects of increasing extracellular concentrations and decreasing extracellular pH (acidosis) alone or combined with halothane in isolated guinea pig atria: laboratory investigation (Oshita *et al*), 534

Jehovah's Witnesses, aprotinin therapy to reduce blood loss in: correspondence (Litvan *et al*), 77

Kalow, Werner: Canadian Anaesthetists' Society Research Recognition Award, 73

Ketorolac, see Analgesics, NSAID

# Kidney

- renal dysfunction in patients undergoing cardiac surgery, can multifactorial classifications predict outcome after? (Bryson *et al*), A13-B
- role of, in hyperglycemia during cardiopulmonary bypass (Braden *et al*), A64-A

# Labour

- advanced, combines spinal-epidural analgesia in (Abouleish *et al*), 575

see also Anaesthesia, obstetric

Laparoscopic cholecystectomy, see Surgery

Laparoscopy, laparotomy, see Surgery, gynaecological

Laryngoscopy, see Intubation, tracheal

# Larynx

- obstruction, percutaneous transtracheal jet ventilation for paediatric endoscopic laser treatment of laryngeal and subglottic lesions: clinical report (Depierraz *et al*), 1200
- oedema, during course of labour, revealed by repeated airway evaluation giving rise of changing Mallampati scores: clinical report (Farcon *et al*), 50
- vocal cords, paralysis associated with difficult gastric tube insertion: clinical report (Ibuki *et al*), 431
- teaching cricoid pressure application using a force measuring device, (O'Leary *et al*), A5-A

Literature, anaesthetic, critical appraisal of (Greene), R70; R74

# Liver

- failure, cerebrovascular response to CO<sub>2</sub> in: transcranial doppler velocity vs PaCO<sub>2</sub> during anaesthesia for orthotopic liver transplant (Doblar *et al*), A34-A
- hepatitis, toxicity, absence of trifluoroacetate antibody after halothane anaesthesia in patients exhibiting no or mild liver damage (Sakaguchi *et al*), 398

- jaundice, malignant obstructive, vecuronium neuromuscular block in patients with: correspondence (Baraka), 759

# Lung(s)

- pulmonary compliance, determination of intrinsic PEEP and, during one-lung ventilation and its relationship with preoperative FEV<sub>1</sub> (Drover *et al*), A62-A
- pulmonary oedema, intraoperative, in a young cocaine smoker: clinical report (Singh *et al*), 961
- pulmonary hypertension and pregnancy: clinical report (Smedstead *et al*), 502
- tracheal granulations secondary to wall compression by endotracheal tubes in infants: correspondence (Yahagi *et al*), 1123
- tracheal obstruction: correspondence (Agarwal and Kausik), 1015; reply (Baraka), 1016
- tracheo-bronchial angles in infants and children: correspondence (Kubota *et al*), 1016

MAC, see under Potency, anaesthetic

Magnesium, see Ions

# Manpower

- ambulance officers, mask lung ventilation by: performance assessment (Devitt *et al*), 111
- anaesthesia personnel, opioid and substance abuse by, use of refractometry to identify: laboratory investigation to identify: laboratory investigation (Eagle *et al*), 248
- anaesthetists
  - mask lung ventilation by: performance assessment (Devitt *et al*), 111
  - personality factors and practice of anaesthesia: a psychometric evaluation (Clarke *et al*), 393
  - recruitment: medical education (Yang *et al*), 621

Marijuana, see Ataractics

# Measurement techniques

- acid base, gas tension, continuous intra-arterial blood gas system (CIABG), clinical assessment of: clinical report (Uchida *et al*), 64
- assessment of recovery from vecuronium neuromuscular blockade, influenced by localized hypothermia (Young *et al*), 1172
- blood flow, effect of enflurane and isoflurane anaesthesia on, in dogs, studied by microspheres: laboratory investigation (Yano and Takaori), 149
- capnometry in infants, the most proximal and accurate site for sampling end-tidal CO<sub>2</sub>: laboratory investigation (Halpern and Bissonnette), 984
- carbon dioxide, capnography, detection of embolism by, transesophageal echocardiography, pulmonary artery pressure and precordial auscultation (Couture *et al*), A24-A
- cardiac output after haemorrhage in dogs, initial distribution volume of glucose and: laboratory investigation (Shimodate *et al*), 257

- *Doppler ultrasound*
    - during isoflurane/N<sub>2</sub>O anaesthesia and surgery, velocity, "vessel area" and "volume flow," (Schregel *et al*), 607
    - to assess the influence of arterial oxygenation on cerebral venous oxygen saturation during hyperventilation (Matta *et al*), 1041
    - velocity, transcranial, vs PaCO<sub>2</sub> during anesthesia for orthotopic liver transplant, the cerebrovascular response to CO<sub>2</sub> in hepatic failure (Doblar *et al*), A34-A
    - echocardiography, transesophageal, detection of carbon dioxide embolism by (Couture *et al*), A24-A
    - electroretinography during orbital compression following intraorbital regional block for cataract surgery (Loken *et al*), 802
    - haemodynamic response to fat embolism, effect of choice of anaesthetic on (O'Leary *et al*), A5-B
    - interleukin-6 and tumour necrosis factor during cardiopulmonary bypass: correspondence (Abe *et al*), 876
  - *pulse oximetry*
    - assessment during total intravenous anaesthesia with ketamine (Joly and Benhamou), 227
    - failure to be of use in case of haemoglobin Hamersmith: clinical report (Lang *et al*), 965
    - lingual-pulse oximetry (Kao *et al*), A36-B
    - preoperative, detection of congenital methaemoglobinaemia by: clinical report (Chisholm and Stuart), 519
    - to measure arterial oxygen desaturation during peripheral venous cannulation in children (Gombar *et al*), 288
  - pulsatility index of the uterine and umbilical arteries in low and high risk parturients, effect of epidural anaesthesia for caesarean section on (Halpern *et al*), A27-A
  - refractometry to identify opioid containing solutions: laboratory investigation (Eagle *et al*), 248
- Memory**
- MAC-amnesia for isoflurane (LeDez *et al*), A20-A
  - recall, awareness with, during propofol/flentanal total intravenous anaesthesia, midazolam decreases the incidence of (Blew *et al*), A3-A

## Position

- effect of, on placement of epidural catheter: correspondence (Breen), 356
- laryngeal mask airway, cuff pressure and position during anaesthesia lasting one to two hours (Brimacombe and Berry), 589
- lateral decubitus, effects, cardiovascular and effects on ventilation of position, during single lung ventilation (Friedlander *et al*), 26

## Potency

## - MAC

- amnesia for isoflurane (LeDez *et al*), A20-A
- does intraoperative neurological injury affect? (Hall *et al*), A18-B
- isoflurane MAC, reduction with intrathecal midazolam: laboratory investigation (Schwieger *et al*), 144

## Pregnancy

- cardiopulmonary effects of abdominal insufflation in: fetal and maternal parameters in the sheep model (Southernland *et al*), A59-B
- pulmonary hypertension and: clinical report (Smedstad *et al*), 502

see also Anaesthesia, Obstetric

## Premedication

- of patients undergoing cardiac catheterization, anxiety, sedation, satisfaction and arterial oxygen saturation in (Bergeron *et al*), A32-B
- omeprazole reduces preoperative gastric fluid acidity and volume in children (Nishina *et al*), 925

Preoperative assessment, a comparison of selection of laboratory tests by the computer vs the anaesthetist (Davies *et al*), 1156

Propofol, see Anaesthetics, Intravenous

Prostaglandins, see Hormones

Psychological responses, preparation of children for surgery: editorial (Goresky and Whitsett), 1033; review article (McGraw), 1094

Quality assurance, see under Anaesthesia

Rabbits, see Animals

Rats, see Animals

Recall, see Memory

## Receptors

- antagonists, granisetron, reduction of postoperative nausea and vomiting with (Fujii *et al*), 291
- desensitization, propofol-induced neuroexcitation and: editorial (Orser), 366
- glycine, GABA, effect of propofol on: clinical report (Ries *et al*), 414

- glutamate, NMDA subtype of, propofol selectively inhibits (Bertlik *et al*), A6-A

#### Records

- Anaesthetic Services Programme Encompassing Nova Scotia (ASPENS): anaesthesia practice (Clark), 716
- clinical anaesthesia file: editorial, 91
- design of forms: special article (Fisher), 973
- assessment, the Vancouver sedative recovery scale for children: validation and reliability of scoring based on videotaped instruction (Macnab *et al*), 913
- characteristics following induction of anaesthesia with a combination of thiopentone and propofol (Rashiq *et al*), 1166

#### Recovery

- delayed awakening from general anaesthesia in a patient with Hunter syndrome: clinical report (Kreidstein *et al*), 423
- midazolam
  - does not prolong, following total intravenous anaesthesia with propofol/alfentanil (Blew *et al*), A63-B
  - /propofol co-induction does not delay recovery from anaesthesia (Elwood *et al*), A64-B
- room, postanesthetic care unit, does anaesthetic management contribute to hypertension and tachycardia in? (Rose *et al*), A25-B
- time following short term sedation with propofol after cardiac surgery (Karski *et al*), A40-A

Refractometry, see Measurement techniques

Renal, see Kidney

#### Research

- anaesthesia, same day consent for: correspondence (Sikich and Lerman), 1234
- publication as a result of CAS Residents' competition: occasional review (Mazer and McClenaghan), 116

#### Resuscitation

- cardio-pulmonary, end tidal O<sub>2</sub> and CO<sub>2</sub> after: correspondence (Watanabe *et al*), 354
- neonatal: the NRP guidelines: continuing medical education (Elliott), 742

Revell, Daniel G. (b.1904): History of Canadian Anaesthesia (Morris), 450

#### Risk management

- adverse events in anaesthesia: the wrong drug: editorial (Davies and Webb), 83
- anaesthetic drug error: minimizing the risk: clinical report (Orser and Oxorn), 120; correspondence (Dain), 755; (Agarwal *et al*), 755
- packaging of saline and Quelicin (Abbott): correspondence (Dain), 452; reply (Currie), 452

#### Safety hazards

- drug labels on anaesthesia carts: correspondence (Goresky and Pipa), 655

- Sabex drug labels: correspondence (Boldt and Renwick), 75; reply (Levesque), 76

Salbutamol, see Pharmacology

Sedation, anxiety, patient satisfaction and arterial oxygen saturation in premedicated patients undergoing cardiac catheterization (Bergeron *et al*), A32-B

#### Serotonin

- and noradrenaline depletion, influence of, on thiopental-induced hyperalgesia in rats (Froelich *et al*), A18-A

Sheep, see under animals

#### Smoking

- cigarette smoke increases bupivacaine metabolism in rats: laboratory investigation (Bruguerolle *et al*), 733
- effect of, on post-succinylcholine muscle pain: correspondence (Nigrovic and Wierda), 453

Staphylococcus aureus, see Infection

#### Statistics

- anaesthesia pharmacodynamics: impact of cost-minimization strategies in a tertiary care hospital (Hawkes *et al*), A61-B
- anaesthetic record forms design: special report (Fisher *et al*), 973
- cost accounting anaesthesia care, a simple spreadsheet tool for (Morscher *et al*), A60-B
- cost-benefit analysis of neuromuscular blocking agents (Donati), R3; R8
- cost does not alter drug usage (Horow and Rosenberg), 1047
- cost-effectiveness analysis (CEA) of the prevention of post-operative nausea/vomiting (PONV) with ondansetron (OND) (Mathieu), A23-B
- cost impact of needle-free intravenous systems on a paediatric anaesthesia department (Farran and Goresky), A65-A
- cost minimization strategies of anaesthetic drugs in a tertiary hospital, evaluation of (Hawkes *et al*), 894
- cost of an established quality assurance programme: brief review (Eagle *et al*), 813; editorial (Duncan), 765
- cost of anaesthesia: correspondence (Eagle and Kryski), 265
- cost of preoperative laboratory tests selected by the computer (Health Quiz II: HQII) vs the anaesthetist (Davies *et al*), 1156
- cost-utility evaluation of post-operative analgesia in the elderly in a community hospital using decision analysis (Peter), A22-B

Sternotomy, see under Surgery

Stress, see under Complications

Sturge-Weber syndrome, see Complications

Succinylcholine, see Neuromuscular relaxants

Surgeons, substance abuse in (Lutsky *et al*), 564

#### Surgery

- abdominal or thoracic, bupivacaine 0.125% improves

- continuous postoperative epidural fentanyl analgesia after (Badner *et al*), 387
- ambulatory, in children with suspected or proven malignant hyperthermia susceptibility (Carr *et al*), A56-B
  - *cardiac*
    - aortocoronary bypass graft
      - dose finding study of propofol for continuous intravenous sedation after (Karskiet *et al*), A17-B
      - thyrotoxicosis factitia following: clinical report (Redahan and Karski), 969
    - autologous blood predonation, benefits of: editorial (Hardy *et al*), 1021; preliminary report on a hospital-based autologous donor programme (Pinkerton), 1036
    - bleeding from the SvO<sub>2</sub> monitoring port of PA catheter during: correspondence (Inomata and Nichikawa), 877
    - elective, pharmacodynamics and haemodynamics of doxacurium in patients undergoing (McDonagh *et al*), A14-A
    - in aspirin-treated patients, a comparison of the efficacy of high or low dose aprotinin, or tranexamic acid, to decrease blood loss and transfusion requirements in (Murkin *et al*), A33-A
    - in Jehovah's Witnesses, aprotinin therapy to reduce blood loss: correspondence (Litvan *et al*), 77
    - in patients with preoperative renal dysfunction, can multifactorial classifications predict outcome after? (Bryson *et al*), A13-B
    - laryngeal mask airway in: correspondence (Llagunes *et al*), 1016
    - myocardial revascularization, comparison of sufentanil-propofol versus sufentanil-midazolam anaesthesia for elective (Ralley *et al*), A47-A
    - performed without active systemic cooling, effect of tranexamic acid on postoperative bleeding in (Karski *et al*), A41-A
    - recovery time following short term sedation with propofol after (Karski *et al*), A40-A
    - relationship between oxygen consumption and neuromuscular blockade after (McDonagh *et al*), A14-B
  - *cardiovascular*
    - aortocoronary bypass, safety of indomethacin in early postoperative period following (Bailey *et al*), A41-B
    - cardiopulmonary bypass
      - during sequential single lung transplant, cardiorespiratory events leading to (Hennessy *et al*), A42-A
      - hyperglycemia during, the role of the kidney (Braden *et al*), A64-A
      - interleukin-6 and tumour necrosis factor during: correspondence (Abe *et al*), 876
      - natural and synthetic antifibrinolytics in: review article (Hardy and Bélisle), 1104
      - normothermic, determination of post-operative hypothermia following (Baker *et al*), A15-B
      - propofol sequestration within the extracorporeal circuit (Hynynen *et al*), 583
      - separation from, is epinephrine or norepinephrine superior to placebo during (Smith *et al*), A48-A
      - thoracoscopy, video-assisted, for patent ductus arteriosus interruption: clinical report (Lavoie *et al*), 310
      - warm cardiac irrigation during, haemodynamic consequences of (Lingaraju *et al*), 384
    - coronary artery bypass graft
      - anaesthesia for, supplemented with bupivacaine and morphine: clinical report (Kowalewski *et al*), 1189
      - cerebral microembolization during (Naser *et al*), A4-A
      - comparison of pipecuronium with pancuronium on haemodynamic variables and plasma catecholamines in CABG patients (Neidhart *et al*), 469
      - early versus conventional tracheal extubation following: perioperative hemodynamics and stress response (Cheng *et al*), A16-B; postoperative complications and hospital discharge (Cheng *et al*), A49-A; postoperative myocardial ischemia and infarction (Cheng *et al*), A48-B; postoperative ventilatory dynamics (Cheng *et al*), A16-A
      - general anaesthesia supplemented with subarachnoid bupivacaine and morphine for: clinical report (Kowalewski *et al*), 1189
      - hemodynamic effects of doxacurium and vecuronium in patients undergoing (Smith *et al*), A35-B
      - hydromorphone patient-controlled analgesia (PCA) after (Searle *et al*), 198
  - *carotid*
    - body tumours, excision, postoperative respiratory depression following excision of: clinical report (Baraka), 306
    - endarterectomy
      - airway obstruction, following (Sharma *et al*), A38-B
      - regional vs general anaesthesia for (Cirone *et al*), A37-A
  - circumcision in adults, regional anaesthesia for: a comparative study of 5 different techniques (Szmuk *et al*), 1181
  - endoscopy, upper gastrointestinal sedation for: a comparison of alfentanil-midazolam and meperidine-diazepam (Donnelly *et al*), 1161
  - *gynaecological*
    - granisetron for preventing post-operative nausea and vomiting, optimal anti-emetic dose (Fujii *et al*), 794
    - laparoscopy and laparotomy, metabolic gas exchange during (Lind), 19
  - *laparoscopic cholecystectomy*
    - acidosis, respiratory and subcutaneous emphysema during: clinical report (Pearce), 314; correspondence (Mezon and Badner), 874; reply (Pearce), 875

- preoperative multi-model analgesia facilitates same day discharge in (Michaloliakou *et al*), A76-A
  - *laparoscopy*
    - Nissen fundoplication, pneumothorax during: clinical report (Mangar *et al*), 854
    - out-patient, combined ondansetron and droperidol in (Koutsoukos and Belo), A70-B
  - *laser*
    - carbon dioxide CO<sub>2</sub> laser: microinstrumentation, hazards of in treatment of congenital laryngomalacia (CLM) (Baxter), 332
    - endoscopic laser treatment of laryngeal and subglottic lesions in children, percutaneous transtracheal jet ventilation for: clinical report (Depierraz *et al*), 1200
    - propofol for pulsed laser treatments in paediatric outpatients: clinical report (Vischoff and Charest), 728
  - major elective, gastric intramucosal pH monitoring - a study in patients undergoing (Hall *et al*), A19-A
  - *neurological*
    - cerebral arteriovenous malformations in children: clinical report (Millar *et al*), 321
    - posterior fossa aneurysm surgery, a comparison of two modalities of evoked potential monitoring during (Manninen *et al*), 92
    - rhizotomy, dorsal; pain management of children following: brief review (Geiduschek *et al*), 492
    - spinal cord, airway obstruction during anaesthesia for anterior cervical cord decompression: correspondence (Beaulieu and Davies), 874
  - *orthopaedic*
    - arthroplasty
      - hip, embolism during, detected by transoesophageal echocardiography: clinical report (Lafont *et al*), 850
    - hip patients, spinal anaesthesia but not general enhances neutrophil biocidal activity in laboratory investigation (Erskine *et al*), 632
    - knee, femoral nerve block: single injection vs continuous infusion for (Hirst *et al*), A63-A
    - knee joint replacement, intraarticular bupivacaine provides analgesia for, but not evidence of preemptive blockade (Badner *et al*), A74-B
    - knee, outpatient, comparison of effects of ketorolac vs morphine on recovery from general anaesthesia during (Newton and Moote), A75-B
  - foot surgery, lateral popliteal sciatic nerve block compared with subcutaneous infiltration for analgesia following (NcLeod *et al*), 673
  - rhizotomy, see under Surgery, neurological
  - scoliosis, idiopathic, predicting blood loss in surgery for (Guay *et al*), 775
  - outpatient, are patients satisfied with day bed surgery? (Chung *et al*), A25-A
- see also, specific procedures under Surgery
- *otolaryngologic*
    - adenotonsillectomy, anaesthesia for: correspondence (Hackman), 757; reply (Webster *et al*), 758
    - middle ear microscopy, clonidine premedication for induced hypotension with total intravenous anaesthesia for: correspondence (Maroof *et al*), 164
    - tonsillectomy and uvulopalatopharyngoplasty, glosso-pharyngeal nerve block for: correspondence (Bruin *et al*), 1236
  - *paediatric*
    - caudal morphine and early extubation of the trachea: post cardiac surgery in (Carr *et al*), A15-A
    - congenital laryngomalacia (Baxter), 332
    - fitness of children for, anaesthetic agreement in assessment of (Peter *et al*), A55-B
    - preparing children: psychological issues: review article (McGraw), 1094
  - phaeochromocytoma, presenting as acute hyper-amyalaemia and multiple organ failure: clinical report (Gan *et al*), 244
  - *postoperative period*
    - fatal myocardial infarction in, differs from fatal myocardial infarction elsewhere (Knill *et al*), A47-B
    - volume of glucose and cardiac output in (Ishihara *et al*), A32-A
  - spinal cord, see Surgery, neurological
  - sternotomy, repeat median, blood loss in patients undergoing, randomized to either high or low dose aprotinin or tranexamic acid (Murkin *et al*), A46-B
  - *thoracic*
    - thoracotomy
      - effects of epinephrine on the continuous infusion of epidural fentanyl for postoperative analgesia following (Baron *et al*), A3-B
      - for extracardiac surgery in infants, caudal morphine analgesia for (Marakis *et al*), A58-A
      - post-operative pain control
        - comparison of lumbar epidural and intravenous fentanyl infusions for (Baxter *et al*), 184
        - epidural opioids for: editorial (Grant), 169;
    - transthoracic oesophagectomy, one-lung or two-lung ventilation during (Tachibana *et al*), 710
  - *transplantation*
    - liver, orthoptic (OLT)
      - high dose aprotinin reduces transfusion requirements of blood and blood products during (Dobkowski *et al*), A33-B
    - percutaneous 14 French, the perfect percutaneous cannula for establishing venous bypass access in (Frenette *et al*), A35-A
    - transcranial doppler velocity vs PaCO<sub>2</sub> during anaesthesia for, the cerebrovascular response of CO<sub>2</sub> in hepatic failure (Doblar *et al*), A34-A

- lung, sequential single lung transplant (SSLT), critical cardiorespiratory events leading to cardiopulmonary bypass during (Hennessy *et al*), A42-A
- trauma, blunt cervical, thoracic and abdominal complicated by an unsuspected tracheal rupture, management of: clinical report (Huang *et al*), 1208
- *urological*
  - TURP, does a mid-lumbar block level provide adequate anaesthesia for? (Beers *et al*), 807
- vascular, from aspirin<sup>TM</sup> to zylprim<sup>TM</sup>: new considerations for major vascular surgery (Ansley), R121; R128
- Sympathetic nervous system
- *pharmacology*
  - adrenaline, role in the management of hypotension induced by spinal epidural anaesthesia: review article (Morgan), 404
  - clonidine
    - and postoperative myocardial ischaemia: correspondence (Fulgencio *et al*), 550
    - premedication for induced hypotension with total intravenous anaesthesia for middle ear microsurgery: correspondence (Maroof *et al*), 164
  - dopamine, dopexamine, arrhythmogenic potential of, during halothane anaesthesia in dogs (Neustein *et al*), 542
  - ephedrine, role in the management of hypotension induced by spinal and epidural anaesthesia: review article (Morgan), 404
  - epinephrine
    - effects of, on continuous infusion of epidural fentanyl for postoperative analgesia following thoracotomy (Baron *et al*), A3-B
    - elevation of PETCO<sub>2</sub> after submucosal injection of: correspondence (Brooker and James), 162
    - or norepinephrine, which is superior to placebo during separation from cardiopulmonary bypass (Smith *et al*), A48-A
  - guanethidine and barytium regional intravenous, compared in the treatment of sympathetically mediated pain (Wharton *et al*), A73-B
  - metaraminol, role in the management of hypotension induced by spinal and epidural anaesthesia: review article (Morgan), 404
  - methohexamine, role in the management of hypotension induced by spinal and epidural anaesthesia: review article (Morgan), 404
  - noradrenaline and serotonin depletion, influence on thiopental-induced hyperalgesia in rats (Froelich *et al*), A18-A
  - phenylephrine, role in management of hypotension induced by spinal and epidural anaesthesia: review article (Morgan), 404
  - vasopressors, role of in management of hypotension induced by spinal and epidural anaesthesia: review article (Morgan), 404
- Syndromes, see name under Complications
- Tachycardia, see under Complications, postanaesthetic Temperature
- hypothermia, localized, influences assessment of recovery from vecuronium neuromuscular blockade (Young *et al*), 1172
- normothermic cardiopulmonary bypass, determinants of post-operative hypothermia following (Baker *et al*), A15-B
- hypothermia following normothermic cardiopulmonary bypass, determinants of (Baker *et al*), A15-B
- skin, toe, as a guide to epidural anaesthesia dosing (Sato *et al*), 232
- toe-thumb, age-related decrease in, difference (Sato *et al*), 579
- Thiopentone, see Anaesthetics, Intravenous
- Toxicity, cocaine-abusing patient, perioperative care of: editorial (Cheng), 883
